PROFESSIONAL SUMMARY

Python Backend Developer and Machine Learning Engineer (BCA, 2026) with hands-on experience building and deploying full-stack AI applications using Python, FastAPI, and REST APIs. Skilled in end-to-end data analysis — preprocessing, EDA, feature engineering, and model development/evaluation (regression and classification) with Scikit-learn, Pandas, and NumPy — through independent projects and a Machine Learning Developer internship. Experienced deploying applications to the cloud (Render, Vercel) and collaborating via Git/GitHub in Agile, SDLC-driven workflows. Strong foundation in data structures, algorithms, OOP, debugging, and testing, with a focus on clean, scalable, maintainable code.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, SQL, HTML5, CSS3

Machine Learning & Data Science: Scikit-learn, Regression, Classification, Model Evaluation, Data Analysis, EDA, Feature Engineering, Data Preprocessing, Pandas, NumPy

Backend & API Development: FastAPI, Flask, REST API Design, API Integration, Backend Development

Frontend: React.js, JavaScript, HTML5, CSS3, Chart.js, Responsive Web Development

Developer Tools: Git, GitHub, Docker, Postman, Jupyter Notebook, VS Code

Cloud Deployment & Monitoring: Render, Vercel, GitHub Pages, UptimeRobot, Cloud Deployment

Core CS Concepts: Data Structures, Algorithms, Object-Oriented Programming, SDLC, Agile Collaboration, Debugging, Testing, Problem Solving, Performance Optimization

PROFESSIONAL EXPERIENCE

Machine Learning Developer Intern — Cognetix Global Technology LLP (Remote)

May 2026 – June 2026

- Performed data preprocessing, exploratory data analysis (EDA), and feature engineering on real-world datasets using Python, Pandas, and NumPy.
- Built and evaluated machine learning models with Scikit-learn, applying regression and classification techniques for predictive modeling and model evaluation.
- Tested and debugged model pipelines, documenting workflows and results to support reproducibility and performance optimization.
- Collaborated using Git and GitHub for version control and code review as part of a distributed, Agile development workflow.

PROJECTS

DiagnoWeb – AI-Powered Diabetes Risk Predictor

Python, FastAPI, Scikit-learn, Pandas, NumPy, JavaScript, Chart.js, Render | [GitHub](#) | [Live Demo](#)

- Built a full-stack AI web application with a FastAPI backend serving a trained Scikit-learn classification model through RESTful prediction endpoints.
- Engineered an end-to-end data pipeline — preprocessing, feature engineering, and model training/evaluation — for diabetes risk classification.
- Integrated Chart.js visualizations for risk scores and prediction confidence, automated PDF report generation, and deployed the application on Render for public access.

InsureIQ – AI-Based Insurance Cost Estimator

Python, FastAPI, Scikit-learn, Pandas, JavaScript, Render, GitHub Pages, UptimeRobot | [GitHub](#) | [Live Demo](#)

- Developed a full-stack ML web application for real-time insurance cost estimation, integrating a FastAPI backend with a trained Scikit-learn regression model via REST API.
- Implemented BMI calculation and city-tier regional prediction logic, along with prediction history tracking and interactive result charts.
- Deployed the backend on Render and the frontend on GitHub Pages, configuring UptimeRobot monitoring to reduce cold-start latency.

Developer Portfolio Website

HTML5, CSS3, JavaScript, Cloudflare Workers, Vercel | [GitHub](#) | [Live Demo](#)

- Designed and developed a fully responsive, mobile-first personal portfolio website using HTML5, CSS3, and JavaScript, featuring custom animations and a modern glassmorphism UI.
- Integrated an AI-powered chatbot using Cloudflare Workers to enable real-time, interactive conversations about skills, projects, and experience.
- Built and deployed the site on Vercel with continuous deployment from GitHub, optimizing performance and load times across devices.

Cohort – Unified Professional Communication Platform (Team Project)

React, Node.js, MongoDB, Socket.IO, REST API | [GitHub](#)

- Built and maintained reusable React.js UI components and integrated Node.js REST API endpoints into the frontend, gaining full-stack experience across the complete data flow.
- Contributed to feature testing, UI bug fixes, peer code reviews, and technical documentation within an Agile SDLC process.

EDUCATION

Bachelor of Computer Applications (BCA) — Sardar Vallabhbhai Global University, Ahmedabad

2023 – 2026 | CGPA: 7.8 / 10

Relevant Coursework: Python Programming, Data Structures & Algorithms, Database Management Systems, Software Engineering, Web Technologies, Data Analysis & Machine Learning Fundamentals

LANGUAGES

English (Professional) | Gujarati (Native) | Hindi (Fluent)
